

Basic Detail Report

Pendant

Date
ca. 600-900

Primary Maker
Maya (archaeological culture)

Medium
jade

Description
Jade was the most precious material known to the ancient Maya, more valuable than gold or copper. The range of greenish-blue colors found in this mineral reminded the Maya of young sprouts of corn, the staple on which the entire civilization was built. Rulers, elites, and even wealthy commoners wore jade whenever possible. This bead was most likely worn over the heart.

Dimensions
Overall: 2 3/8 x 1/2 in. (6 x 1.3 cm)
